

Data Sheet

eBlocker 2 Pro

The **eBlocker 2 Pro** is a small computer that is connected to your home network and protects your privacy on the Internet. It makes your online behavior anonymous, blocks data collectors and data collecting ads and filters harmful content. Connected directly to the home network, the device itself does not collect any data. Simply connect the eBlocker to your router, it works with any browser and without any software installation on any Internet-enabled device - even on Smart TVs and game consoles. This distinguishes the eBlocker from conventional browser plugins against trackers and online advertising.

eBlocker 2 Pro is the perfect plug & play solution to protect your online privacy. eBlocker 2 Pro comes with a one-year or lifetime license for daily updated filter lists and feature upgrades.
